Cockpit purifying treatment

Fragrance « AIR FRAIS » or « FLEUR DE CUIR »

VERSION 2 - JUIN 2010

www.mecotech-performances.com

DEFINITION

- Full and fast « One-Shot » treatment for the car's interior and air-conditioning system with a micro-diffusion of actives principles.
- Eliminates bacteria, molds and viruses.
- Destroys bad smell and leaves a pleasant fragrant in the car.
- Also suitable for boat's cockpit, camping-car, caravan, bus, truck and construction vehicle.

HOW TO USE

- Clean the interior of the vehicle.
- Start the engine and run the air-conditioning on cold and circulation mode with the fan set to maximum.
- Check the fans are open and the windows closed.
- Position the passenger's seat as far back as possible.
- Agitate the spray can and place it on the car's floor on the passenger side between the seat and the dashboard.
- Triggers the diffuser until it clicks.
- Close the vehicle and leave it as it is until empty (3 to 4 min).
- Wait for 10 minutes before opening and aerating the car.
- This treatment is recommended all 6 months for a pleasant and healthy interior.
